

## Dos Equis Chain – Basic Directions

Aspect ratio: 5.0

Class exercise ring size:

- 18 AWG (1.02mm) 0.203” (5.2mm)

1. Close a red ring and put it on a tail wire.

2. Close a blue ring through the red ring and the tail wire.

3. Add a second tail wire through the two rings so that the rings stand out perpendicular to each other, and make an “X” when viewed from the end.

4. Close a green ring through the both the red and blue rings, to the left of the red ring.

5. Close a plain ring through the both the red and blue rings, and also through the green ring, to the right of the red ring.

6. If you were to look down the chain from the tail wires the positioning of the rings would look this. Dos Equis = 2 “X”s. The first two rings (the red and blue) form the first X, and the second pair of rings (green and copper) form the second X. The rest of the chain is just a repeat of this pattern.

7. Close a red ring through the both the green and plain rings, to the left of the green ring.

8. Close a blue ring through the both the green and plain rings, to the right of the green ring, and also through the red ring.

9. Repeat steps 4 through 7 until complete.
