

European 6-in-1 Ribbon – Basic Directions

Similar weaves: European 4-in-1 Ribbon

Aspect ratio: 4.3 or larger

Class exercise ring size:

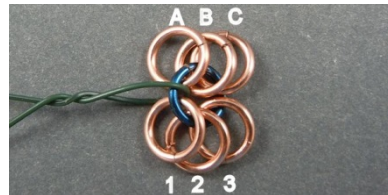

- 18 AWG (1.02mm) 0.188" (4.8mm)

1. Close twenty two of the plain jump rings.

2. Start by assembling a 3-wide chain. Place six closed plain rings on an open blue jump ring and close the blue jump ring.

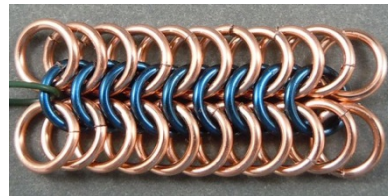

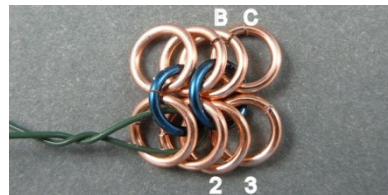

3. Arrange the rings as shown.

Open a blue jump ring and insert it up through plain rings “3” and “2”, in that order, and down through plain rings “B” and “C”, in that order. Add two closed plain rings on the open blue jump ring and close it.

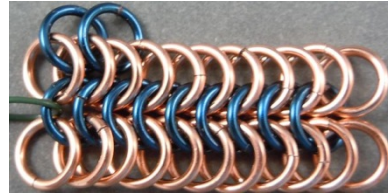

4. Continue adding to the chain by repeating the previous step until the chain is the desired length.

5. To make a wider ribbon chain, open a blue jump ring, insert it through the first three plain rings on the outside, and close it. Make sure the blue jump ring goes through these three plain rings in the same direction as the adjacent blue jump ring.

Open a blue jump ring, insert it through the 2nd, 3rd, and 4th plain rings on the outside, and close it.

Add a jump ring to the 3rd, 4th, and 5th rings, 4th, 5th, and 6th rings, etc. until complete.

6. Make the ribbon as wide as desired by repeating the previous step.
