

## Japanese 4-in-1 Chain Maille – Basic Directions

Class exercise ring sizes:

- 18 AWG (1.02mm) 0.094” (2.4mm)
- 18 AWG (1.02mm) 0.141” (3.6mm)

1. Make a segment of simple chain equal to the final length of the project, alternating the large and small jump rings.

2. Make a second segment of simple chain the same as the first segment.

3. Starting at one end of the two segments link the first large jump ring from the first segment to the first large jump ring from the second segment using a small jump ring.

4. Link the second large jump ring from the first segment to the second large jump ring from the second segment using a small jump ring.

5. Continue linking the large jump rings of the two segments until all the large jump rings have been linked to the corresponding large jump rings of the other segment.

6. Make a third segment of simple chain the same as the first two segments.

7. Link the large jump rings of the third segment to the corresponding large jump rings of one of the other segments.
