

Rope Chain - 1 thru 2 – Basic Directions

a.k.a. Twist Chain, 1 into 4 Spiral Chain

Aspect ratio: 4

Class exercise ring size:

- 18 AWG (1.02mm) 0.172" (4.4mm)

This version of the spiral chain is very unstable and will not hold the spiral unless the ends are secured to prevent the spiral from relaxing.

1. Close a ring and put it on a tail wire.

2. Insert the second ring through the first ring and close it.

3. Lay the rings flat on your finger, and arrange them in the direction you want the chain to spiral. Insert the third ring through both the first and second rings and close it.

4. Lay the rings flat on your finger, and make sure the spiral is correct. Insert the next ring through two previous rings and close it.

5. From this point on, insert the next ring through the previous two rings in the same space as the third previous ring.

6. Repeat step 5 until complete.
