

## Roundmaille – Basic Directions

Prerequisite: Square chain

Aspect ratio – 3.7

Class exercise ring size:

- 18 AWG (1.02mm) 0.156" (4.0mm)

Roundmaille is a six side Square Chain; instead of pairs of rings as in the Square Chain there are triplets of rings.

1. Close three plain rings and thread a tail wire through each.

2. Twist the three tail wires together to form a single large tail wire.

3. Hold the chain up by the tail wire and look at it from the bottom. Arrange the three rings until they look like this.

4. Insert three red rings. One through each pair of the previous rings. Hold the chain up by the tail wire and look at it from the bottom. The rings should look like this.

5. Insert three blue rings. One through each pair of red rings. Hold the chain up by the tail wire and look at it from the bottom. The rings should look like this.

6. Flip the blue rings to the outside, just like in the Square Chain, and insert three red rings. One through the inside of each pair of blue rings. The rings should look like this.

7. Repeat steps 5 through 6 until the desired length is reached.
