

Vipera Berus – Basic Directions

Similar weaves: Orbital Vipera Berus, Viper Basket, Vipera Berus Doubled

Aspect ratio 3.4

Class exercise ring size:

- 16 AWG (1.29mm) - ID 0.188" (4.8mm)

1. “Eye” notation: Adding a ring “through the eye” means that the new ring will go through the two rings at point “A”. “Around the eye” means that the new ring will go through both of the rings at points “B” and “B”. “Outside the eye” means that the new ring will go through one of the rings at point “B”, which ring will be covered in the directions.

2. Build a 1-in-1 chain using the red and blue jump rings. Alternate colors in the chain.

3. Twist the chain slightly so that the second red ring in the backbone chain lies on top of the first red ring. Insert a plain jump ring up through the red ring on the right, around the eye, and down through the red ring on the left.

4. Turn the chain over and twist it slightly so that the second blue ring in the backbone chain lies on top of the first blue ring. Insert a plain jump ring up through the blue ring on the right, around the eye, and down through the blue ring on the left.

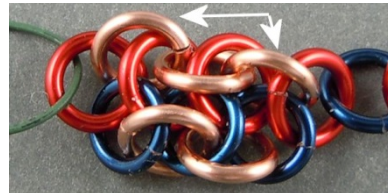

5. Turn the chain over and twist it slightly so that the third red ring in the backbone chain lies on top of the second red ring. Insert a plain jump ring up through the red ring on the right, around the eye, and down through the plain and red rings on the left as shown.

6. Turn the chain over and twist it slightly so that the third blue ring in the backbone chain lies on top of the second blue ring. Insert a plain jump ring up through the blue ring on the right, around the eye, and down through the plain and blue rings on the left as shown.

7. Turn the chain over and twist it slightly so that the next red ring in the backbone chain lies on top of the previous red ring. Insert a plain jump ring up through the red ring on the right, around the eye, and down through the plain and red rings on the left as shown. Note that the two plain rings go through the middle plain ring in the same direction.

8. Turn the chain over and twist it slightly so that the next blue ring in the backbone chain lies on top of the previous blue ring. Insert a plain ring up through the blue ring on the right, around the eye, and down through the plain and blue rings on the left as shown. Note that the two plain rings go through the middle plain ring in the same direction.

9. Turn the chain over and twist it slightly so that the next ring in the backbone chain lies on top of the previous ring of the same color. Insert a plain ring up through ring on the right, around the eye, and down through the two rings on the left as shown. Note that the two plain rings go through the middle plain ring in the same direction.

10. Repeat the previous step until done.
