

## Wiggly Chain – Basic Directions

Aspect ratio: >4

Class exercise ring size:

- 18 AWG (1.02mm) 0.172" (4.4mm)

1. Close a blue ring. Link a red ring through the blue ring and close it. Insert a tail wire through both rings.

2. Note that these two pairs of rings are different. The pair on the left spirals inward in a clockwise direction and the pair on the right spirals inward in a counterclockwise direction. It makes a more consistent design if all pairs of rings spiral inward in the same direction.

3. Close a red ring through the first two rings.

4. Close a blue ring through the first two rings and through the red ring you just added. Be sure this pair spirals inward in the same direction as the first pair.

5. Close a red ring through the previous two rings.

6. Close a blue ring through the previous three rings. Be sure this pair spirals inward in the same direction as the previous pair.

7. Repeat steps 5 and 6 until complete.
